

06-type_casting

June 5, 2022

```
[1]: my_str = "2"
      my_int = 1
      my_float = 3.14

      # type cast
      new_str = int(my_str)
      new_int = float(my_int)
      new_float = str(my_float)

      print(type(new_str))
      print(type(new_int))
      print(type(new_float))
```

```
<class 'int'>
<class 'float'>
<class 'str'>
```

```
[2]: my_str = "sam"
      my_str = int(my_str)
```

```
